## SUMMARY

Innovative and passionate Full Stack Web Developer with a Web Development Certificate from the University of Texas in San Antonio. Strengths in design, development, and maintaining of performant websites. Ability to work in a fast-paced and diverse team environment to develop applications from ideation to execution and exceed expectations.

## TECHNICAL SKILLS

**Front-End:** HTML, CSS, JavaScript, JQuery, Responsive Design, PWAs, React.js, Handlebars.js

**Back-End:** MERN Stack, MySQL, Security and Session Storage, User Auth, Cookies, Firebase

**Frameworks:** Bootstrap, Bulma, Foundation, Express

## PROJECTS

### FanPass | (Project Title)

<https://github.com/samadams412/fanPass> | (Project Repository)

<https://fan-pass.herokuapp.com/> | (Deployed Application)

- Full-Stack music blog site that follows MVC paradigm, uses Handlebars.js as the templating engine, Sequelize as the ORM, and the express-session npm package for authentication.
- Core responsibilities included, creating all necessary Models, creating and handling routes, and generating the view using Handlebars.js. As well as setting up user authentication and persistent data.
- **Technologies Used:** Handlebars.js, Express.js, Node.js, Sequelize ORM, MySQL, dotenv, Heroku, Bulma.io

### ConcertTracker |

<https://github.com/samadams412/concertTracker> |

<https://samadams412.github.io/concertTracker/> |

- Front-End application that provides users with ticket information, and music videos in one search by integrating data received from multiple server-side API requests.
- Core responsibilities included working with Youtube API to provide customized search information to the user.
- **Technologies Used:** HTML, CSS, Foundation, JQuery, Youtube and Ticketmaster API

### E-Commerce Backend |

<https://github.com/samadams412/e-commerce-backend> |

<https://watch.screencastify.com/v/dLpLoHPJWERzB62U1L5U> | (Application Demo)

- Back-End for an e-commerce site. Configures an Express.js API to use Sequelize to interact with a MySQL database. Demonstrates the use of database models, association methods, and API routes required to perform RESTful CRUD operations.
- Core responsibilities consisted of configuring an Express server to use Sequelize to interact with a MySQL database. Testing API GET routes in Insomnia Core for categories, products, tags, and displaying the data in a formatted JSON.
- **Technologies Used:** MySQL, Sequelize, dotenv, Express, Insomnia Core
